Dr. Nirmal Kandel is a medical doctor with master’s degrees in medical anthropology, public health, and business administration. At present, he is Head of Evidence and Analytics for the WHO Health Security Unit, in WHO-HQ managing health security data analytics and evidence, the dynamic preparedness metric, preparedness economics, IHR benchmarks, preparedness research and development of health systems for health security. Before this, Dr. Kandel was the technical lead for developing the JEE tools and processes, the WHO benchmarks for IHR capacities, and the planning guidance and toolkit for the National Action Plan for Health Security. He started his public health career in his native Nepal, and then worked on health system development in India. And, before moving to Zurich to work at HQ, Dr. Kandel served as the emergency lead for the WHO Indonesia country office.
